All our activities are designed to include chess activities every week

- **Classes**
3 classes every week from an experienced and titled instructor
- **Seminar**
1 seminar every week by a 2600+ Grandmaster
- **Training games**
It is very important to play specific targeted training positions to work on specific areas in the game. We provide a solution by setting up positions twice a week for students to play against each other and train in specific concepts.
- **Blitz/Rapid Tournaments**
2 tournaments every week for our students to play competitive games against each other.
- **Review test**
It is very important for students to review the learned content. Hence, we have a review test that will be allotted once a week with all the content they learned that week from different coaches. This will be used to evaluate student progress and attention during classes.
